About me

Computer Science student with experience working for Brazilian and German companies with web and desktop programming, design, data mining from the web, strategic thinking, user experience and general IT architectural issues. Knowledge with commonly used programming languages as well as developing, management and software testing processes and techniques, networks and general hardware infrastructure. I have leadership behavior and am in search for new challenges for my career.

Work Experience

since
01/2015

○ Software Engineer Intern

[C.E.S.A.R. | Sorocaba, São Paulo - Brazil](#)

Internship developing systems and solutions with local and remote team to clients from various segments focused on innovation, excellence, integrity and commitment to achieve the best results with transparency and creativity. Participation in projects mixing the front-end and back-end development of web systems integrated with mobile devices (Android and iOS).

02/2012
12/2014
